2 Applied Research and Innovation Project Information

A good project for collaboration with a college is one that is applied (practical and hands-on), offers flexible timelines (is not time sensitive) to allow for student learning curves, and is both challenging and rewarding from a professional perspective.

2.1 Proposed Project Details

Please use additional sheets if you would like to propose multiple projects.

| | |
|-------------------------------------|--|
| Title: | How would you describe the proposed project in one sentence? |
| Objective: | What is the problem you want to solve? |
| Description (1500 character limit): | Briefly describe the proposed project for which you would like to collaborate with us. What specific assistance do you require from us? What are the desired outcomes or deliverables? |
| Proposed Completion Date: | When do you need to have this proposed project completed by? |

2.2 Relevant Areas of Expertise and Resources

Centennial has multiple schools, centres, and institutes that may be able to help on your proposed project. Please identify all areas covered by your proposed project so that we can refer internally to all relevant business units (click individual links to learn more).
